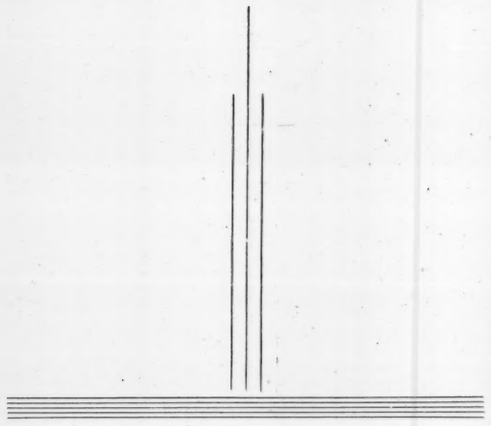
MACHINE DESIGN

Index to Volume 7

January to December, 1935

Cleveland, Ohio



MACHINE DESIGN is a monthly Professional Journal conceived and edited for, and directed expressly to those executives and engineers responsible for the creation and improvement of machines built for sale, and for the selection of the materials and parts to be used.

It completely blankets the field of Machine Designing and is read by the chief engineers and designers of the more than 6200 plants that build machines for sale—a readership of 25,000.
